*Esta actividad está destinada exclusivamente para profesionales sanitarios. Una vez recibida su solicitud de inscripción, la revisaremos y, si cumple los criterios de asistencia, recibirá la invitación con los datos de conexión.*

This Stryker Product Training Event will provide education and training in the safe and effective use of the following Stryker products: Flyte, the surgical procedures in which such products are used, and/or the disease states that can be treated with such products.

A surgeon must always rely on his or her own professional clinical judgment when deciding whether to use a particular product when treating a particular patient. Stryker does not dispense medical advice and recommends that surgeons be trained in the use of any particular product before using it in surgery. The information presented is intended to demonstrate the breadth of Stryker product offerings. A surgeon must always refer to the package insert, product label and/or instructions for use before using any Stryker product. Products may not be available in all markets because product availability is subject to the regulatory and/or medical practices in individual markets. Please contact your Stryker representative if you have questions about the availability of Stryker products in your area.
